Apportionment Ratio

NOTE: Attention: Multistate Taxpayers - All franchise tax returns that have a year ending on or before December 31, 1998 will calculate the Mississippi receipts for franchise taxes in the same manner as in previous years. Starting for years ending on or after January 1, 1999, taxpayers that apportion their income to Mississippi using an apportionment method **that includes a sales or receipts ratio** will no longer use the income tax ratio to calculate the Mississippi receipts for the franchise tax apportionment ratio. They will use the same receipts in the franchise tax apportionment ratio as used in the income tax sales ratio and then add to both the numerator and denominator any non-apportioned income. Those taxpayers whose income tax ratio does not include a sales or receipts ratio must continue to use the income tax ratio to calculate the Mississippi receipts in the franchise apportionment formula. See instructions for the text of the law change.
